Doctor Ordered

NEW Tamper-Proof Security Rx Prescription Pads

R_x

Losses due to fraud have reached billions of dollars annually and more than half this fraud involves counterfeiting and forgery.

Prescription Pad Fraud is a very serious problem in the United States, across Canada and now in Atlantic Canada.

With the co-operation of all Medical and Pharmaceutical staff, along with the Police, we are becoming more aware of how serious this problem is. We believe that education and the use of our **NEW Security Rx Prescription Pads**, with our exclusive layered approach of patented security features will give you the peace of mind you need when protecting pharmacists, doctors and their patients. Our pads will help protect against prescription counterfeiting for illegal prescription drug use.

Our Tamper Proof Prescription Pads are designed to make it virtually impossible to duplicate, but easy to detect if tampered with. This is an affordable way to offer security for you and your patients.

For only a few cents per prescription, you can perform an ounce of prevention and help combat the war on drugs, to ensure they do not destroy families, claim lives and increase insurance premiums.

We are doing our part by showing due diligence in creating and supplying security prescription pads and other security printing services. As technology progresses, we are continually upgrading our security features to provide you with the best products and services available!

Prescriptions are a legal document.

The Real cost of Fraud is not incurred before but After the fact

Rainbow Printing Ltd. is proud to have provided companies and individuals with Quality Printing Services for 18 years. We are a New Brunswick Commercial Sheet Fed and Licensed Security Printing Operation, which is family owned and operated. Authentic Security paper can only be sold to licensed security printers.

Our dedicated staff, who are committed to serving you for all your printing needs, are one of the main reasons for our continued success and growth.

Our in-house facilities and state of the art equipment, as well as our qualified employees, enables us to give personal attention to a small order of business cards or to a large run of specialty die cut presentation folders and security documents.
